Psychometry's definition is the enhanced ability to sense and feel imprints that have been impressed upon people, places and objects, by holding it or being in its presence.

Psychometry is purely sensing, not seeing and is more associated with Clairsentience.

'Psychomancy' is Greek, meaning 'psycho' - the soul, mind & understanding (psyche). The 2nd part 'mancy' means to divine or foresee, foreknow and detect things that are secret or hidden. Psychometry is receiving impressions from the astral senses or 'psychic sensing' or Clairsentience, 'clear sensing'.

Energy is Universal but everyone makes an impression. This impression is left behind wherever we go, whatever has happened.

The ability to sense the psychic touch or psychometry can reveal what is hidden and unknown about an object and that person.

**We will explore all the questions normally associated with most psychic phenomenon:**

How does psychometry work? How it is different to clairvoyance? Do you need psychic ability? How accurate is it?

It will be an exploratory day and you will learn ways to attune to the vibrations of an object to give clear and accurate readings.

**PLEASE BRING:**

3 objects, at least 2 concealed in envelopes or bags. Objects can be letters, jewellery, ornaments, or any memorable items. Some ability to focus & relax is helpful. A very positive approach is welcomed.

**Fee £25**
